Deako Simple Ventilation Timer Switch

Countdown timer and hourly ventilation Timer Switch

This Simple Ventilation Timer Switch is designed to monitor and control the operation of the bathroom exhaust fan and delivers a precise amount of fresh air ventilation throughout the day, automatically. Using the dial located on the bottom of the switch, the user can adjust the 'ventilation' setting.

The 'ventilation' setting allows the user to specify how many minutes per hour they want the fan to run, while the 3 countdown timer buttons specifies how many minutes the user wants the fan to run during normal use. Both of these setting help homeowners save energy and meet continuous ventilation codes, such as ASHRAE 62.2 and CalGreen Title 24.

Features

- Adjustable Ventilation Timer to ensure proper bathroom ventilation, expelling stale air to improve indoor air quality

- Three countdown timer options: 10 min, 30 min or 60 min; simply push the button to set countdown time preference

- Designed to meet ASHRAE 62.2, Energy Star and CalGreen Title 24 codes for continuous ventilation*

- Manual On/Off fan control

- Saves energy, countdown timer automatically turns the fan off

* when used with ASHRAE 62.2 compliant fans
